**TYPE CERTIFICATE DATA SHEET No. H13EU**

This data sheet which is part of Type Certificate No. H13EU prescribes conditions and limitations under which the product for which the Type Certificate was issued meets the airworthiness requirements of the Federal Aviation Regulations.

**Type Certificate Holder:** AIRBUS HELICOPTERS DEUTSCHLAND GmbH (AHD)  
D-86609 Donauwoerth  
Germany

**Type Certificate Holder Record:** Eurocopter Deutschland GmbH changed name to Airbus Helicopters Deutschland GmbH on January 7, 2014.

**I. Model MBB-BK 117 A-1 (Transport Category A&B) Helicopter, Approved March 29, 1983.**

**Engines.** 2 Lycoming LTS 101-650 B-1

**Fuel.** See Rotorcraft Flight Manual.

**Installed Engine Limits**

	Output Shaft Torque % (Ft-Lbs.)	Gas Generator Speed N-1 % (RPM)	Output Shaft Speed N-2 % (RPM)	Measured Gas Temperature °C (°F)

Max. rearward range: at 3858 lb: 183.7 in. aft of datum  
at 7900 lb: 179.0 in. aft of datum

Lateral C.G. Limits. Up to 6614 lbs (3000 kg): Max. deviation 3.94 in. (100 mm) right or left of the fuselage median plane.  
Above 6614 lbs (3000 kg): Max. deviation 3.15 in. (80 mm) right or left of the fuselage median plane.

Empty Weight C.G. Range. None.

Max. Weight. 3585 (kg) (7900 lbs)

Min. Crew. 1 (right-hand seat only)

Passengers. standard: 9, when equipped and operated in accordance with FMS 9.2-27: ten

Max. Baggage. Max. permissible floor loading 123 lb/sq. ft.

Fuel Capacity.

with standard fuel tank	total fuel: 879.1 l usable fuel: 867.5 l
with self sealing fuel tank	total fuel: 861.6 l useable fuel: 850.0 l

Oil Capacity. Refer to Rotorcraft Flight Manual

Max. Operating Altitude. 18000 ft.

Rotor Blade and Control Movements. For rigging information refer to the MBB BK 117 C-2 Maintenance Manual.

**Information Pertinent to the MBB-BK117 C-2(e)**

Effective from Serial Number 9601 if Garmin G500H cockpit is installed.

Type design changes to the MBB-BK117 C-2 that install Garmin 500H avionics equipment and limit operations to VFR only have been approved. These type design changes result in a helicopter that AHD has named MBB-BK117 C-2e. EASA issued an amended type certificate (EASA.R.010 dated April 17, 2015) that identifies the MBB-BK117 C-2e. In accordance with FAR 21.19, the FAA determined that the type design changes involved did not rise to the level that required an FAA amended type certificate. However, the FAA does wish to recognize that helicopters with these type design changes exist, therefore the designation MBB-BK117 C-2(e) will be used. See Note 12 for more information on the type design changes for MBB-BK117 C-2(e).

## For Serial Numbers 20003 through 20999

Fuel.	See Rotorcraft Flight Manual.
-------	-------------------------------

FAR 29.1183 at Amendment 29-16  
FAR 29.1189 at Amendment 29-16  
FAR 29.1309(b),(d),(e) at Amendment 29-16  
FAR 29.1521 at Amendment 29-16

and the following FAR's that revert to the original Amendment 29-16 certification basis and were not codified at that time

FAR 29.610(d)(4)  
FAR 29.1027  
FAR 29.1305(a)(21) and (23)  
FAR 29.1337(e)

FAR Part 36 Appendix H at Amendment 36-22

For the Model MBB-BK 117 D-2:

Type Certificate No. H13EU amended: October 9, 2014.  
Date of application for amended Type Certificate: December 21, 2009.

14 CFR 21.29 and 14 CFR 29 effective Feb. 1, 1965 plus Amendments 29-1 through 29-40 for the new or changed parts with respect to the MBB-BK117 C-2, identified in the

document ETYC 1183/09-MHa, supplemented with requirements from other amendments listed below:

14 CFR 29 requirements with amendment through 29-51 for:

29.25, 29.59, 29.62, 29.67, 29.77, 29.81, 29.85, 29.143, 29.173, 29.175, 29.177, 29.351, 29.397, 29.562, 29.602, 29.865, 29.923, 29.1317, 29.1323, 29.1329, 29.1351, 29.1359, 29.1457, 29.1459, 29.1521, 29.1587, B29.5, B29.7

14 CFR 29.631 at Amendment 29-40 for the entire tail section only

14 CFR 36 Appendix H at Amendment 36-25

The main differences between the MBB-BK117 C-2 and the MBB-BK117 D-2 are as follows:

- a) Installation of Turbomeca Arriel 2E engines with FADEC control.
- b) New tail section including composite structure and fanned tail rotor (FENESTRON) with composite blades.
- c) New cockpit indication system using integrated modular avionics.
- d) Auto Flight System as a standard configuration of the MBB-BK117 D-2.
- e) Main gearbox modifications to support 30 minute run-dry capability.
- f) Maximum take-off weight increased to 3650 kg.

The German Authority Luftfahrt-Bundesamt (LBA) originally type certificated this under its type certificate number (LBA 3049). The FAA validated this product under U.S. Type Certificate Number (H13EU). Effective September 28, 2003, the European Aviation Safety Agency (EASA) began oversight of this product on behalf of the German LBA (EASA TC R.010).

#### For the Model MBB-BK 117 D-3:

Type Certificate No. H13EU amended: November 25, 2020.

Date of application for amended Type Certificate: March 23, 2018.

For significantly affected areas with respect to MBB-BK 117 D-2 as identified in CRD D0000M505304, Revision C, dated June 19, 2020, 14 CFR § 29 effective February 1, 1965 plus Amendments 29-1 through 29-55 for the following requirements: 29.571, 29.573

For the remaining areas, systems, parts or appliances, 14 CFR § 29 effective February 1, 1965 plus Amendments 29-1 through 29-55 for the following requirements: 29.610, 29.631, 29.1501, A29.4

For the remaining areas, systems, parts or appliances, 14 CFR § 29 effective February 1, 1965 plus Amendments 29-1 through 29-51 for the following requirements: 29.1, 29.25, 29.59, 29.62, 29.67, 29.77, 29.81, 29.85, 29.143, 29.173, 29.175, 29.177, 29.351, 29.397, 29.602, 29.923, 29.1323, 29.1329, 29.1351, 29.1359, 29.1457, 29.1459, 29.1521, 29.1587, B29.5, B29.7

14 CFR § 29 effective February 1, 1965 plus Amendments 29-1 through 29-40 for all the other applicable requirements with the following exceptions:  
 29.631 at Amendment 29-16 (for cockpit windscreens only),  
 29.863 at Amendment 29-16 (for unaffected parts from BK 117 C-1),  
 29.1011 (b),(e) at Amendment 29-16,  
 29.1019 at Amendment 29-16,  
 29.1021 (for Main Gearbox only) at Amendment 29-16

The main differences between the MBB-BK 117 D-2 and the MBB-BK 117 D-3 are as follows:

- a) New five bladed main rotor with bearingless design
- b) Elongated rotor mast with integrated flanges for blade attachment
- c) Redesigned upper controls with five arm swashplate and adapted kinematics
- d) Enlarged hub cap
- e) Adaption of rigging procedure and tooling for main rotor controls

- f) Removal of mechanic stick centering device
- g) Integration of an electric hydraulic pump into one hydraulic system to allow full range pre-flight check of flight controls
- h) Adaption of IMA SW HELIONIX to V8.0 according to Technical Note Major change TN X460C1555E01 for the common part shared with EC175 and TN D460M0520E03 for the MBB BK 117 specific part.
- i) Adaption of Automatic Flight Control System software to new rotor dynamics
- j) Removal of anti-vibration systems (improved) Light Active Vibration Control System (LAVCS(+)) and 3Hz Landing Gear dampers
- k) Adaption of stiffness of forward crosstube and LG skids
- l) Adaption of stiffness of horizontal stabilizer
- m) Adaption of stiffness of tail rotor Smart Electro-Mechanical Actuator rod
- n) Relocation of roof mounted Emergency Locator Transmitter antenna and addition of alternative ARTEX ELT-4000.
- o) Shortening of the deflector from optional upper (roof mounted) cable cutter
- p) Removal of structural reinforcements for LAVCS and LG dampers
- q) Adaption of stiffness of pilot and co-pilot collective control sticks
- r) Replacement of DTD by wireless Airborne Communication Server
- s) Redesign of optional main rotor blade folding kit (provisions only)
- t) Maximum weight limit will be extended to 3,800 Kg (no longer considered an alternative MTOW).

#### Import Requirements.

To be considered eligible for operation in the United States, each aircraft manufactured under this type certificate must be accompanied by a certificate of airworthiness for export or certifying statement endorsed by the exporting foreign civil airworthiness authority which states (in the English language): "The aircraft covered by this certificate has been examined, test, and found to comply with the German LBA TC Number 3049 (or EASA TC Number R.010) approved under the U.S. Type Certificate Number H13EU and to be in a condition for safe operation."

The U.S. airworthiness certification basis for aircraft type certificated under FAR Section 21.29 and exported by the country of manufacture is FAR Sections 21.183(c) or 21.185(c).

The U.S. airworthiness certification basis for aircraft type certificated under FAR Section 21.29 exported from countries other than the country of manufacture (e.g., third party country) is FAR Sections 21.183(d) or 21.183(b).

Refer to the applicable bilateral agreement to verify eligibility for import into the United States of both new and used aircraft based on the scope of the agreement, to identify any required statements by the exporting authority on the export certificate of airworthiness (or equivalent document), and for procedures for coordinating exceptions to conformity statements on these documents. Refer to FAA Order 8130.2, *Airworthiness Certification of Aircraft*, for requirements for issuance of an airworthiness certificate for imported aircraft.

Model MBB-BK 117 A-1 is ineligible for a U.S. certificate of airworthiness. See Note 9.

#### Equipment.

The minimum required equipment as prescribed in the applicable airworthiness regulations (see Certification Basis) must be installed in the respective helicopter for certification.

For the Model MBB-BK 117 A-1, LBA-approved MBB-BK 117 A-1 Rotorcraft Flight Manual dated December 9, 1982 Revision 0, or later approved revision, is required.

For the Model MBB-BK 117 A-3, LBA-approved MBB-BK 117 A-3 Rotorcraft Flight Manual dated March 15, 1985, or later as required.

For the Model MBB-BK 117 A-4, LBA-approved MBB-BK 117 A-4 Rotorcraft Flight Manual Revision 1 dated April 8, 1987 or later as required.

For the Model MBB-BK 117 B-1, LBA-approved MBB-BK 117 B-1 Rotorcraft Flight Manual Revision 0, dated December 10, 1987 or later as required.

For the Model MBB-BK 117 B-2, LBA-approved MBB-BK 117 B-2 Rotorcraft Flight Manual Revision 2 dated November 20, 1992, or later as required.

For the Model MBB-BK 117 C-1, LBA-approved MBB-BK 117 C-1 Rotorcraft Flight Manual Revision 0 dated October 2, 1992, or later as required.

For the Model MBB-BK 117 C-2, LBA-approved MBB-BK 117 C-2 Rotorcraft Flight Manual Revision 0 dated December 20, 2000, or later as required.

For the MBB-BK 117 C-2(e), EASA-approved MBB-BK 117 C-2e Rotorcraft Flight Manual Revision 1 dated June 17, 2015, or later as required. See Note 12.

For the Model MBB-BK 117 D-2, EASA-approved MBB-BK 117 D-2 Rotorcraft Flight Manual Revision 0 dated April 16, 2014, or later as required.

For the Model MBB-BK 117 D-3, EASA-approved MBB-BK 117 D-3 Rotorcraft Flight Manual Revision 4.1 dated March 29, 2021, or later as required.

#### Service Information.

Service bulletins, structural repair manuals, vendor manuals, aircraft flight manuals, and overhaul maintenance manuals, which contain a statement that the document is LBA approved, are accepted by the FAA and are considered FAA approved. These approvals pertain to the type design only.

“Each of the documents listed below must state that it is approved by the EASA or – for approvals made before September 28, 2003 – by the German LBA. Any such documents are accepted by the FAA and are considered FAA approved.

- Service Bulletin,
- Structural repair manuals,
- Vendor manuals,
- Aircraft flight manuals, and
- Overhaul and maintenance manuals.

This applies only to the acceptance of the type design data.”

#### NOTES:

NOTE 1. Current weight and balance report including list of required equipment and list of equipment included in certified empty weight and loading instructions when necessary, must be provided for each helicopter at the time of original certification: the certificated empty weight and corresponding center of gravity location must include unusable fuel of (16.7 lb. at 176.77 in.) and engine oil (2 x 9.64 lb. at 176.77 in.) and transmission oil of (27.8 lb. at 176.38 in.).

NOTE 1A. Ten (10) passengers are permitted with MBB Kit Number 117-86099 or, -86100 installed.

NOTE 1B. With 80 Kg auxiliary fuel tank installed (P/N 117-891011) 187 US gal. (1248 lbs, 173.6 in.) total; 184.2 US gal. (1230.2 lbs, 173.5 in) usable.

NOTE 2. The following placard must be displayed in clear view of the pilot:

"This helicopter must be operated in compliance with the operating limitations specified in the LBA-approved Rotorcraft Flight Manual. The "Airworthiness Limitations" section of the Rotorcraft Maintenance Manual must be complied with".

In addition, all placards required in the LBA-approved Rotorcraft Flight Manual must be installed in the appropriate locations.

## NOTE 3.

For Model MBB-BK 117 A-1: Refer to the MBB-BK 117 Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Preliminary Revision 4, dated 20 February 1983, or a later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 A-3 and Model MBB-BK 117 A-4: Refer to the MBB-BK 117 Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Temporary Revision 6, dated 5 March 1983, or a later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 A-4: Refer to the MBB-BK 117 Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Revision 4, dated July 1, 1986 or later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 B-1; Refer to the MBB-BK 117 Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Revision 8, dated December 15, 1987 or later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 B-2; Refer to the MBB-BK 117 Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Revision 18, dated January 17, 1992 or later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 C-1; Refer to the MBB-BK 117 C Maintenance Manual Appendix A; Chapter 9, "AIRWORTHINESS LIMITATIONS", Revision 0, dated October 2, 1992 or later LBA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 C-2; Refer to the MBB-BK 117 C-2 Maintenance Manual; Chapter 4, "AIRWORTHINESS LIMITATIONS", Revision 0, or later LBA/EASA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 D-2; Refer to the MBB-BK 117 D-2 Maintenance Manual; Chapter 4, "AIRWORTHINESS LIMITATIONS", Revision 0, or later EASA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

For Model MBB-BK 117 D-3; Refer to the MBB-BK 117 D-3 Maintenance Manual; Chapter 4, "AIRWORTHINESS LIMITATIONS", Revision 0, dated September 25, 2020, or later EASA-approved issue, for the retirement life limitations of the helicopter parts which are critical from a fatigue standpoint. These values of retirement on service life cannot be increased without FAA Engineering approval.

Additional information essential for proper maintenance of the helicopter is contained in the MBB-BK 117 Maintenance and Repair Manual.

## NOTE 4.

**Equivalent Safety Findings**

For Models MBB-BK 117 A-1 up to B-1;

FAR 29.175(b) Demonstration of Static Longitudinal Stability (See NOTE 8)

For Models MBB-BK 117 A-1 up to C-1:

FAR 29.811(h)(1) Exterior Markings

FAR 29.1151(b) Rotor Brake Controls

For Model MBB-BK 117 C-2:

FAR 29.807 (a)(4) Emergency exits

FAR 29.1151(b) Rotor Brake Controls

FAR 29.1303 (a),(j) VNE indication

FAR 29.1549 (b) Powerplant Instruments

FAR 29.1457(d)(5) Amdt 52, FAR 135.151(g)(1)(i), ELOS No: SP4261RD-R

FAR 29.1457(c) Cockpit voice recorders, with Airbus modification E-2711

For Model MBB-BK 117 D-2:

14 CFR 29.807 (a)(4) Emergency exits

14 CFR 29.1545(b)(4), 29.1549(b) Airspeed & Powerplant indication green marking

14 CFR 29.1305, 29.1351(b)(6), 29.1435(a)(3) Part Time Display of Vehicle Parameters

14 CFR 29.1397 and 29.1401 Dual Color Anti Collision light

For Model MBB-BK 117 D-3

14 CFR 29.807 (a)(4) Emergency exits

14 CFR 29.1305, 29.1351(b)(6), 29.1435(a)(3) Part Time Display of Vehicle Parameters

14 CFR 29.1397 and 29.1401 Dual Color Anti Collision light

14 CFR 29.1545(b)(4), 29.1549(b) Airspeed & Powerplant indication green marking

### Special Conditions

For Models MBB-BK 117 D-2 and MBB-BK 117 D-3:

14 CFR 29.1049, 29.1305 , 29.1521 for 30 min Extended Power Rating

- NOTE 5. The engine limits shown are installed limits. For computation purposes 100 percent engine output shaft torque is 519 ft.-lb. and, 100 per cent engine output shaft (N2) speed is 6000 rpm. Also 100% Gas Generator speed is 47,870 r.p.m.
- NOTE 6. This emergency rating can be used for demonstration/training purposes.
- NOTE 7. All modifications or alterations of the powerplant installation type design approved under H13EU must be reviewed by the type certificating office before approval of changes in type design are granted. This includes the engine air intake system, the transmission compartment, engine model, and fuel changes.
- NOTE 8. Airspeed limitations must comply with MBB Service Bulletin BK-117-40-4 (Reference U.S. AD 85-02-04) and minimum ambient air temperature must be limited to -35°C unless MBB Service Bulletin BK-117-40-7 has been accomplished or the MBB stick Position Augmentation System (SPAS) kit has been installed as basic equipment).
- NOTE 9. Model MBB-BK 117 A-1 S/N 7001 to S/N 7054 may be converted to Model BK 117 A-3 in accordance with MBB Service Bulletin SB-MBB-BK 117-10-4 dated April 15, 1985 or later revision. In addition, these serial number helicopters may be further converted to model BK117 A-4 in accordance with MBB Service Bulletin SB-MBB-BK117-80-105 dated November 26, 1987 or later revision. Model MBB-BK 117 A-1 helicopters are ineligible for U.S. certificate of airworthiness due to Airbus Helicopter Deutschland discontinued maintenance of the approved flight manuals for this model, reference Airbus Helicopter Deutschland Technical Information Letter, No. BK117 006-2005.
- Model MBB-BK 117 A-3 S/N 7055 to S/N 7121 may be converted to Model BK 117 A-4 in accordance with MBB Service Bulletin SB-MBB-BK 117-80-105 dated November 26, 1987, or later revision.
- Model MBB-BK 117-B1 S/N 7140 to S/N 7243 may be converted to Model BK 117 B-2 in accordance with ECD Drawing No. 117-800121 (refer to BK 117 Service Information SI-MBB-BK117-36).
- Model MBB-BK-117 A-4, any eligible serial number, may be converted to Model MBB-BK-117 B-1 in accordance with MBB Service Bulletin SB-MBB-BK 117-80-126, revision 1, dated May 16, 1995.

Model MBB-BK117 D-2, any eligible serial number, may be converted to Model MBB-BK117 D-3 in accordance with Airbus Service Bulletin MBB-BK117 D-2-00-003/xx, where the “xx” refers to the customer specific configuration. Once modified according to the design change approved under EASA Major Change Approval 10076247, any MBB-BK117 D-2 helicopter shall be re-identified as MBB-BK117 D-3 and all the related data from this data sheet will apply.

Model MBB-BK 117 B-2 S/N 7203 is ineligible for U.S. registration.

- NOTE 10. Any changes to the type design of this helicopter by means of a amended type certificate (TC), supplemental type certificate (STC), or amended STC, requiring instructions for continued airworthiness (ICA's) must be submitted thru the project aircraft certification office (ACO) for review and acceptance by the Fort Worth -Aircraft Evaluation Group (FTW-AEG) Flight Standards District Office (FSDO) prior to the aircraft delivery, or upon issuance of the first standard airworthiness certificate for the affected aircraft, whichever occurs later as prescribed by Title 14 CFR 21.50. Type design changes (major repairs or alterations) by means of a FAA Form 337 (field approval) that require ICA's must have those ICA's reviewed by the field approving FSDO.
- NOTE 11. Effective January 7, 2014, Eurocopter Deutschland GmbH name was changed to Airbus Helicopters Deutschland GmbH.
- NOTE 12. Type design changes to the MBB-BK117 C-2 were approved June 30, 2015. These type design changes resulted in the MBB-BK117 C-2(e), starting from Serial Number 9601. The MBB-BK117 C-2(e) is a VFR only configuration of the MBB-BK117 C-2 utilizing a Garmin 500H flight display system. See Rotorcraft Flight Manual under the Equipment section of this TCDS.
